Bilateral Meetings

- Thursday (1:30pm - 6:00pm)
- Friday (9:00am - 12:00pm)

Description

IPSA, an Italian ICT company based in Turin, develops and distributes Smart Solutions for Healthcare in order to improve clinical and logistics processes in health facilities. The most advanced hardware and software technologies are integrated to improve patient safety and reduce costs.

The company, founded in 1997, has developed innovative solutions for various sectors and it is among the first in Italy to have proposed and implemented complex projects based on web technologies and Radio Frequency Identification (RFID), integrating them with existing information systems.

During the last 5 years, IPSA has focused its Research and Development in the innovation of healthcare processes. IPSA is the first company from the Piedmont Region to be admitted to the register of innovative SMEs, recently constituted it by the Italian Ministry of Economic Development.

In 2015, IPSA was selected by the UK Trade Investment to be part of their Global Entrepreneur Programme and started an internationalization program where the UK healthcare market is one of the main priorities.

Offer

Partnership to distribute innovative hospital solutions to manage drugs & medical devices

IPSA is currently searching for business partners to cooperate in its roadmap of implementation of its "Smart Hospital" solutions in the UK hospital logistics market.

The ideal partner profile is that of an ICT player working in the UK Hospital Logistics arena with a commercial network and delivery abilities.

IPSA's solutions, "Smart Hospital", have the main objective to optimize the management of drugs and medical devices in healthcare facilities while supporting healthcare operators. "Smart Hospital" integrates innovative technologies, both software and hardware, bringing the logics of the "Internet of things (IoT)" to hospitals.
