Bilateral Meetings

- Friday (12:00pm - 4:00pm)

Description

Our teams of experts have gained extensive skills and knowledge in Medical Device Innovation, Product Development, R&D, Quality and Regulations, Clinical Trials and Education. Such capabilities and experiences have been developed from working in a range of companies including start-ups, SMEs, global multinationals, academic institutions, the National Health Service (NHS) and international public health bodies. 5D specialises in understanding your intimate needs and helping you reach your goals, no matter how big or small, by working with you to: Discover, Design, Develop and Deliver your next generation products (from Class I to Class III medical devices). Design, Develop and Deliver improvements to you existing products. Discover, Develop and source new innovations. Design and Develop innovation pipelines. Design and Develop R&D strategies. Design and Develop education and training programs. Design, Develop and Deliver publications for journals, conferences and marketing. Review and audit technical files for medical device development. The 5D Health Protection Group also provides an exceptional customer specific Testing Services Plus+ - Testing with a difference. By utilising our in house laboratories or more specialised laboratories, all of your microbiology, biofilm, biochemical and cellular needs can be provided for. Furthermore your training and educational needs can be tailored specifically for you by utilising the services of the 5D Education Academy. The 5D Health Protection Group provides a high quality integrated solution approach bringing together the essential components of - Innovation, Technical, Scientific, Education and Clinical - to add another dimension to your business proposition.
