Bilateral Meetings

- Thursday (1:30pm - 6:00pm)
- Friday (9:00am - 12:00pm)
- Friday (12:00pm - 4:00pm)

Description
SciCurve provides advanced data intelligence for its clients in Biotech, Pharma and public sector (universities, government institutions). We monitor global research, R&D and patent activity for our clients. Our platform of specialized machine learning alert and monitoring systems is processing data on more than 80% of global bio-medical science and corporate patent activity in real time. Our clients identify emerging trends for R&D and relevant patent activity for legal and risk departments. SciCurve engine is also used to search for possible participants in global R&D collaborators. SciCurve helps our clients monitor activity of competition and target talents and professionals for HR purposes. PR departments use the content generated by SciCurve visualization tools in communication with general public.
