Bilateral Meetings

- Thursday (1:30pm - 6:00pm)

Description

Christopher Harris Consulting (CHC) works closely with established companies, start-up and early stage businesses active in the Life Science sector to develop products and services and achieve success and business growth.

Companies, in this challenging market environment, can become focused on the day to day pressures and short term decisions. With decades of experience CHC can assist in bringing an independent view and strategic direction to the innovation process. Using knowledge and an extensive network CHC can often open doors, provide valuable assistance and work with you and your team to realise commercial success. Many established, start-up and early stage companies often lack the resources to employ high-caliber individuals whilst gaining early market traction. CHC helps to bridge that gap.
