Offer

## Global scientific & medical analysis organization collaborating with early-stage enterprises

Trajan's focus is on developing and commercializing technologies that enable analytical systems to be more selective, sensitive and specific for biological, environmental or food related measurements especially those that can lead to portability, miniaturization and affordability.

We offer a complete collaborative concept-to-market service, combining technical expertise with global support services and local territory operations to create successful outcomes for our partners.

In another approach, our accelerator model provides a collaborative platform targeting early stage enterprises sharing Trajan's vision to positively impact human wellbeing through the application of science into society. Through access to Trajan's corporate support services, the Accelerator Company is able to focus on its passion, while Trajan facilitates

growth and whole business support, for example through marketing, commercialization, compliance, HR, global supply chain, manufacturing, R&D and broad technical expertise.
