Description

The CLINICAL TRIAL Company™ was formed in 2002. TCTC realised there was an opportunity in the CRO sector for a company which targeted medium size clinical trials and novel products which lacked a classical road map to the market. TCTC ran the pivotal trial for the first Gene Therapy to be approved in the EU.

Regulatory Affairs

The Regulatory Affairs Company™

Central to this process is the Regulatory Affairs function which develops the route to market. The Regulatory Affairs Company™ places great emphasis on planning clients' product road maps to suit their individual product characteristics. At the heart of the Regulatory Affairs offering is the marketing authorisation, the supreme goal. All planning is focused on getting products to market at the earliest opportunity.

The Regulatory Affairs Company™ offers the advantage of comprehensive client-side experience to companies seeking to challenge over-cautious approval strategies which are sometimes an indicator of inadequate broad spectrum Regulatory Affairs experience.
