

Rob Connell

CTO

BioSensors Ltd

Bilateral Meetings

- Thursday (1:30pm - 6:00pm)
- Friday (12:00pm - 4:00pm)

Description

Developers & providers of trans dermal sensors, detecting various bio-chemical markers in blood - completely non-invasively.

Organization Type

University, Company

Email

rob.connell@medepad.com

Country

United Kingdom

City

Liverpool, iC1 Liverpool Science Park [Google map](#)

Request

Collaboration/Distribution/Manufacturing/Investment

BioSensors Ltd is a joint venture including Liverpool John Moores University, that is shortly to engage in a clinical evaluation at a local hospital Trust, that will show the capability of our highly innovative sensor technology to read levels of certain bio-chemical markers in a patients blood, and transmit the resulting data to clinicians real time, thereby removing the need to extract blood on a regular basis, reducing trauma and the risk of infection, whilst providing healthcare professionals with a much clearer picture of a patients wellbeing.

Following successful trials we will be looking at some further development to allow for single and re-usable configurations; which will require manufacture and inevitably will require further funding.

Also, given the nature of the technology, other healthcare markets worldwide would benefit from this type of technology to provide remote analysis of a persons blood no matter the location, so appropriate channels to those markets is also sought.

Cooperation Offered

1. Sales / Distribution
2. Technical co-operation

Cooperation Requested

- 1. Technical co-operation**
- 2. Manufacturing agreement**
- 3. Sales / Distribution**
- 4. Investment/Financing**
