

Alan Weddell

Business Development Manager

Public Health England (Specialist Microbiology Services)

<http://www.gov.uk/phe>

Bilateral Meetings

- Thursday (1:30pm - 6:00pm)

Description

PHE's core mission is to protect and improve the health and wellbeing of the UK and reduce health inequalities. Allied to that, PHE's Specialist Microbiology Services (now part of the National Infection Service for England) provides a comprehensive range of microbiological and serological tests and services (including genomics) for the diagnosis, treatment, and management of infectious diseases, and undertakes significant research and development in the same area e.g. the testing of novel vaccines and antimicrobials, and the evaluation of improved diagnostic tests for both established and emergent infections.

For more information on any of the above, please contact Alan Weddell (Senior Business Development Manager) on 0782 534 2796 or e-mail: alan.weddell@phe.gov.uk
