Business Development

Redx Pharma

<http://redxpharma.com/>

Description

Redx Pharma Plc., is one of the youngest and largest biotechs in the UK with over 150 scientific personnel engaged in the discovery and early development of small molecule therapeutics targeting unmet needs in oncology, infectious diseases and immunology.

Redx is progressing a broad pipeline of differentiated programs for early-stage collaborations with international biopharmaceuticals partners. We have experience of working in a variety of collaborations with a range of partners. We also work closely with academia and other emerging biotech companies to provide expedited routes to commercialisation for innovative programs which require hands-on practical chemistry and pharmacology resources to stringent industry-standards.
