PROJECTS & CLIENTS

PLUSFRESC

This fidelity app allows the user to collect virtual vouchers to get access to discounts during their next purchase.

This allows to protect the environment reducing waste and avoiding to the clients the need of saving the paper tickets somewhere and to have to remember to bring them during their next purchase.

This improves the purchasing experience and increases the client retention.

PROJECTS & CLIENTS

DEALIN9

This app makes faster to enter into contracts, usually for fidelity cards or fast credits, in less than 9 minutes.

The contracts have a legal validity because they are certified by LleidaNet's tools.

Besides, the client's final signature is registered under ISO norms and can be validated by a graphologist.

This app can be adapted to the needs of every client.

MEDIAMARKT

Dealin9 was adapted to the MediaMarkt's corporate identity too.

13

PROJECTS & CLIENTS

FORENSIC SIGNATURE ANALYSIS TOOL

As explained before, Dealin9 certifies the client's signatures.

There is a private app that certifies that a signature belongs to the person that is going to sign.
